PROFESSIONAL PROFILE

Full Stack Web Developer with a background in Animation and Digital Art, specializing in Frontend and with a focus on UX/UI using MERN and Figma. Focused on building responsive, accessible, and high-performance applications. I combine visual sensitivity and technical thinking to implement inclusive, effective digital experiences that solve real user and business needs.

TECHNICAL SKILLS

Frontend Development: JavaScript (ES6+), HTML5, CSS3, React, Tailwind CSS, Bootstrap, Component-Driven Design.

Backend & APIs: Node.js, Express.js, RESTful APIs, MongoDB.

Design & UX/UI: Figma, Responsive Design, Web Accessibility (WCAG), Cross-Browser Testing.

Learning Tech & CMS: Articulate 360, LMS, WordPress, Shopify, Drupal, Salesforce (Email Marketing).

Immersive Tech: C#, C++, Unity 3D, Unity Test Framework, Virtual Reality (VR).

DevOps & Tools: Git, GitHub Actions (CI/CD), Postman, VS Code, Snyk, GitHub Copilot, Claude, Gemini.

Methodologies & Management: Agile, Scrum, Kanban, Jira, Confluence, Smartsheet, Power Apps.

TECHNICAL EXPERIENCE

Full Stack Web Developer | TripleTen

03/2025 - 01/2026

- **Full-Stack Software Engineering:** Completed an intensive, project-driven software engineering program, logging over 800 hours of hands-on development in modern web technologies.
- **Frontend & UX Execution:** Developed and deployed responsive, user-centered web applications from scratch, applying component-driven architecture with React.js, state management, and modern CSS frameworks.
- **Backend & API Engineering:** Built and configured secure, scalable server-side applications and RESTful APIs using Node.js, Express.js, and MongoDB, ensuring database integration and data persistence.
- **Agile Collaboration & Code Quality:** Collaborated in simulated sprint environments using Git/GitHub for version control, participating in rigorous code reviews to optimize performance, clean code standards, and web accessibility.

PROFESSIONAL EXPERIENCE

Learning Experience Designer / Multimedia Developer (Role Evolution)

American Express Global Business Travel

Apr 2022 – Present

- **Technical Leadership & Governance:** Serve as the technical point of contact for a global team of 15 corporate education specialists; established agile workflows and built scalable component libraries that optimized digital learning product production.
- **Accessibility Engineering (WCAG) & UX:** Lead the end-to-end implementation of WCAG standards across internal platforms, ensuring 100% inclusive, accessible, and cross-device digital interfaces.
- **Product Development & Interactivity:** Design and develop complex learning modules and advanced multimedia assets using web technologies, balancing instructional design, aesthetics, and technical performance to maximize engagement.
- **LMS Information Architecture:** Optimize the structure, usability, and deployment of content within Learning Management Systems (LMS), ensuring technical interoperability and intuitive, user-centered navigation.
- **Key Achievement (Innovation):** Conceptualized and developed a functional interactive digital card prototype that validated the innovation strategy before the Chief People Officer (CPO), setting the benchmark for new internal products.
- **Key Achievement (Quality):** Designed and implemented an organization-wide Design QA system, ensuring brand consistency and drastically reducing visual and usability bugs prior to deployment.
- **Key Achievement (Engagement):** Implemented Social Learning solutions within the global intranet, significantly increasing active employee participation and knowledge retention.

Web Designer & CRM Developer

Digitas (*In-House at Sanofi*)

Apr 2019 – Apr 2022

- **CRM & Email Marketing Engineering:** Led CRM and email marketing engineering by coding highly complex responsive newsletters using HTML5, CSS3, and Salesforce, ensuring cross-platform compatibility and optimal rendering.
- **Web Performance Optimization:** Optimized web performance and Core Web Vitals through advanced asset production and compression, driving a significant reduction in page load times and directly improving user retention.
- **Design Governance & Systems:** Designed technical and visual governance for large-scale global brands (Sanofi and Médico ConSentido), deploying design systems that unified international communications under accessibility standards.

Web Designer & WordPress Specialist

Conqr

Jun 2018 – Apr 2019

- **E-commerce & Web Development:** Led the development and deployment of informational websites and e-commerce platforms using WordPress, WooCommerce, and Shopify, ensuring modular architectures and clean, semantic HTML5/CSS3.
- **Cross-Browser Quality Assurance:** Guaranteed visual consistency and cross-browser/cross-device accessibility through rigorous compatibility and responsiveness testing, eliminating navigation bugs across multiple resolutions.
- **Design-to-Development Pipeline:** Optimized workflows by translating static graphic prototypes into production-ready interactive digital products, reducing Time-to-Market through direct collaboration with the design team.

Web Developer & Frontend QA (VR/Web)

Goblin Creative

Jun 2016 – Jun 2018

- **Frontend Development & Architecture:** Designed the structural architecture and developed interactive components for functional websites (HTML/CSS); received international recognition from the Barcolana General Directorate for execution excellence.
- **VR Software Quality & UX:** Ensured software quality and UX in VR environments, programming usability tests with Unity Test Framework to guarantee seamless experiences on Oculus Rift and Google VR.
- **Technical-Commercial Liaison:** Acted as a technical-commercial bridge, translating business requirements into technical proposals, budgets, and development estimations, optimizing the PM's negotiation process.

PROJECTS

JetDevs: Flight Monitoring Platform | 2026 [\[github.com/Pattie9304/flight-status-frontend\]](https://github.com/Pattie9304/flight-status-frontend)

- **Development:** Built a modern web application for real-time global flight tracking, integrating the AviationStack API to fetch live data on departures, arrivals, and flight statuses.
- **Stack & Impact:** React.js, Vite, CSS3, React Router DOM, RESTful API. Engineered a user-centered interface focusing on seamless micro-interactions and performance-optimized data rendering to eliminate latency.

Around the US: Interactive Social Network | 2025 [\[github.com/Pattie9304/web_project_around_auth\]](https://github.com/Pattie9304/web_project_around_auth)

- **Development:** Built a fully responsive Full-Stack social media platform enabling users to share experiences, upload media, and interact in real-time through an intuitive dashboard.
- **Stack & Impact:** React.js, Vite, Node.js, Express.js, REST APIs. Implemented a robust architecture following component-driven frontend practices combined with a lightweight, scalable backend API layer.

EDUCATION & LANGUAGES

BA. in Animation and Digital Art | Tec de Monterrey

2011 – 2015

Professional Full Stack Web Developer Program | Triple Ten

2025 – 2026

Languages: English (Full Professional Proficiency / C1 — **IELTS Certified**) | Spanish (Native Speaker)

CERTIFICATIONS

- Generative AI for Web Developers | LinkedIn Learning | 2026
- Integrating AI into the Creative Process | LinkedIn Learning | 2025
- Creating Inclusive Learning Experiences | LinkedIn Learning | 2025
- Expert Corporate Trainer: E-Learning Course Development | ICEMÉXICO University | 2025
- Learning Experience Design: From Ideas to Impact | NovoEd | 2022
